## INTRODUCTORY

The aim of this work is to give a complete and accurate index to the public and private educational system of the United States. The information has been thoroughly revised to date, and before final printing of the book, proofs submitted to the various school officials for final revision and correction.

In the main *Geographical Classification*, in addition to the public school officials, will be found a complete list of all schools and colleges, together with information as to the kind of school, class of students admitted, religious denomination, year established, and the name of the governing head of the institution. A second complete list of all institutions is given in the *Classified Directory* in which the schools are arranged alphabetically by states, classified according to the kind of school, giving a ready reference or complete list of any particular class of institution, together with the names of the executive officers. A complete *Alphabetical Index* of all schools and colleges will be found at the back of the book from which any institution may be instantly located.

The *Public School System* is fully covered by lists of the state educational officials and county superintendents of schools, the city boards of education, city superintendents, public high schools and principals, and the directors and supervisors of special subjects. A list of the more prominent *Libraries* with the name of the librarian and number of bound volumes, is included in the present volume. An *Educational Business Directory* is also given, which will be found

of much value to the school executive as a convenient and ready reference list of reliable manufacturers and dealers supplying every known need of the school and college.

It is believed the work will be found of value to every one in any way associated with educational institutions, or engaged in educational work. Acknowledgment is made to the various State and City Superintendents of public instruction, private school officials, librarians and others for their kind co-operation and assistance in furnishing data and information necessary for the completion of the volume. While no labor has been spared in the effort to have the work as accurate as possible at the time of going to press, continual changes necessarily preclude absolute accuracy.

School officials, librarians and others will confer a favor by notifying us of changes, and by calling our attention to any inaccuracies or omissions in any department of the work.

## COUNTY SUPERINTENDENTS OF SCHOOLS

Maine has no county superintendents of schools, but has what is known as the "Union Systems" of school supervision. The towns and cities of the state, of which there are 520, are combined into groups by the State Commissioner of Education, and the members of the school committees of the towns in these groups elect one person to serve as superintendent of schools of the group or union, devoting his whole time to that work. The only exception to this arrangement is in the case of towns or cities having more than fifty schools. These are allowed to elect a superintendent of schools to serve that town or city alone.

## SUPERINTENDENTS OF SCHOOLS

Vermont has the town system of schools. The schools of the state are chiefly under the direction of superintendents who give their full time to this work. Any town or city may elect a town superintendent or may combine with other towns in a supervisory district. The superintendents of these districts are elected by the local directors subject to approval by the State Board of Education.

**Remington Rand Business Service, Inc.,**  
465 Washington St., Buffalo, N. Y.

*See announcement on page 1039*

### ADDRESSING MACHINES

These machines are manufactured in two general types, (a) Those making impressions by means of fibre or tissue stencils. (b) Those printing from type, including the machines using metal plates on which the characters are embossed. Either can be had in hand operated, or motor driven. Their special usefulness to schools arises with permanent mailing lists, such as the alumni, catalogue mailings, form letters and the like. The addresses may be imprinted on letters, envelopes, catalogue or magazine wrappers.

**BALANCES**

The common balance consists essentially of a beam resting at its middle point upon a fulcrum and furnished at its extremities with two scale pans; the goods to be weighed are placed in one of these, and known weights placed in the other until the beam assumes a horizontal position. In most of the delicate balances used for chemical analysis, the distance of the center of gravity from the fulcrum can be regulated within small limits. Such balances are protected from air currents, dust, etc., by being enclosed in glass cases with sliding fronts. See, Laboratory Equipment.

**BAND AND ORCHESTRA INSTRUMENTS**

Through a school band and orchestra the message of music and a better appreciation of its value are carried to a larger number of people in the community. In every school will be found a nucleus of interested prospective band or orchestra players.

#### **BATHING SUITS AND APPAREL**

Swimming pools are a necessary adjunct to the modern school, and bathing suits for the students constitute an item which must be given consideration in the school purchases. Many schools furnish the bathing suits for the students, laundering and sterilizing after use. Where students furnish their own apparel the purchases are often made through the athletic department of the school.

#### **BELTS AND BELTING**

Belts are usually made of leather tanned by oak bark. Raw hide is sometimes

used, and is of considerable strength. Cotton belting has the advantage of being cheaper and stronger than leather. Chain belting consists of lengths of leather strung together on wire pins which are not bent as the belt passes over the pulley.

**BLUEPRINT FRAMES**

These frames are similar in construction to a photograph printing frame except that they are much larger. The majority of them rely on the sun's rays for printing. There are some, however, known as vacuum frames, that are adaptable to either sun rays or electricity.

**Dietzgen Co., Eugene, Chicago, New York San Francisco, New Orleans.**

*See announcement on page 961*

**BLUEPRINT PAPER**

This paper is a specially prepared sensitized paper. When tracings are placed in contact with it and exposed to light rays, the drawings will be reproduced on the paper in white lines with a blue background after the paper has been developed by immersing in clean water.

**BLUEPRINTING MACHINERY**

There are two types of blueprinting machines, the cylindrical which are made in both continuous and non-continuous, and the horizontal which are all continuous. The cylindrical machine consists of two segments of curved plate glass. The tracing and paper is kept in contact with these plates by means of roller curtains. When printing an electric arc lamp is lowered into the cylinder. The horizontal machine is motor driven, the tracings and paper being fed in by means of belts onto the printing surface which is lighted by arc lamps. Schools offering courses in

drafting, shop work, and where it is necessary to have a large number of blueprints, have a need for such machines.

## BOOKS

School boards and teachers are convinced of the advisability of providing for pupils' supplementary reading, and the number of adequate school libraries is constantly increasing. New books must be added to these libraries regularly if they are to be popular with the children. Boys and girls should be encouraged to think of books as part of the joy of life, and reading in no sense a duty.

# For Timing Tests

*and wherever intervals  
must be measured*

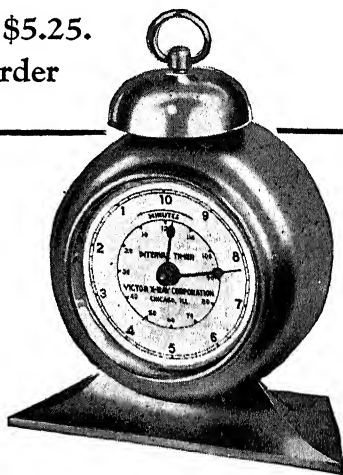

## Use This Victor Timer

It will be sent postpaid for \$5.25.  
Send a check or money order

THERE are abundant uses for an interval timer in educational work. The timing of examinations and tests, laboratory experiments, the "clocking" of exercises of one kind or another . . . you can think of dozens of occasions when to have a reliable instrument that will meter time will be a great convenience, and a way of freeing instructors for other work.

The Victor Interval Timer measures time in any intervals, from 15 seconds to 2 hours. For example, if you set it for 2 minutes, 5, 10 or 15 minutes, it will run exactly that length of time, then ring a bell and stop automatically.

The Victor is used in leading schools and colleges in all parts of the country. Medical schools and laboratories find it indispensable. Don't confuse the Victor with an alarm clock. It is designed for the sole purpose of measuring definite time periods.

The exterior of the Victor is handsome nickel. Modernistic metal base makes it an ornament for any desk. Stands 6 inches high. Base measures 2 by 5 inches. Sturdily built. Will last for years.

Send check or money order and a Victor will be mailed postpaid.

## CRUCIBLES

Open vessels used for melting and calcining substances which need the application of extreme heat, such as metals, ores, glass, etc. They must be made of some infusible, unbreakable substance. Those made of fire-clay and coarse sand is the commonest kind. For analytical purposes platinum and porcelain are much used. Lime or carbon crucibles will withstand the highest temperatures. See, Laboratory Equipment.

## CURTAINS, STAGE

School auditoriums equipped for any form of theatricals or entertainment require a stage curtain. These curtains are made to order and can be had either in the type used by theatres, or in the form of a drape made from velour or other heavy fabric.

## DISINFECTANTS

Agents used to neutralize the action of disease germs with the object of preventing the spread of infectious diseases. The use of disinfectants is highly essential in the cleaning of the schoolroom, the toilets and the washrooms. In addition to being a disinfectant, the material used should be a germicide as well.

## DOMESTIC SCIENCE EQUIPMENT

The primary requirement for the teaching of school domestic science consists of a special table manufactured for the purpose. These tables provide the necessary storage space in the way of cabinets and drawers, and also provide ample working space for the student. Some types are equipped with a gas plate attached to the table, and also with a swinging stool seat attached.

## DRAWING BOARDS AND TABLES

Drawing boards should be so constructed as to eliminate any possibility of warping out of square. Some boards are unmounted which may be used any place, while others are mounted in some manner. The mounted boards may be arranged so as to be folding or stationary. The stationary boards are made with iron or wood pedestals, and in some cases are provided with drawer space to take care of instruments, paper, and other materials.

These fountains are of the bubbling type, and are manufactured in pedestal and wall design. Where the water does not need to be purified they are attached direct to the water supply pipes. In case filtration is needed, the filter is attached to the supply pipes and the fountain operated from the filter. Sanitary drinking fountains are being installed in modern school buildings, on the playground and the athletic field, as they provide pure, fresh, clean water at all times, and in addition prevent the spread of contagion arising from germ-laden mouths.

# EASTMAN CLASSROOM FILMS

*Now used by school systems in thirty foreign countries  
as well as in the United States*

The teaching value of Eastman Classroom Films is clearly indicated by the fact that they are now being used not only in the United States but in thirty foreign countries as well.

About one hundred films are now ready on topics of General Science, Geography and Health, and many more are in preparation. Others are scheduled for early production, in accordance with a carefully worked-out plan to cover comprehensively all topics that lend themselves to treatment by the motion picture.

Send for your copy of "A New Descriptive List of Eastman Classroom Films."

Self-Releasing  
Fire and Panic Exit Latches

VON DUPRIN Self-Releasing Fire and Panic Exit Latches are so simple in design, so sturdily built, so dependable in operation that they have become standard equipment on the school house doors of most of the larger American cities and many of the smaller ones.

Their high quality and reliability gives them such freedom from trouble and from servicing expense that their cost per year is surprisingly low.

## *Food Supplies for Educational Institutions*

The institutional buyer demanding value insists that to have value quality must be maintained. This uncompromising attitude has resulted in careful and scientific analyses. It has developed a fine appreciation of the economy of better foods. Better foods mean increased efficiency and more satisfied guests and pupils.

Nearly fifty years of specialized service in the supply of Hotels, Restaurants and Institutions has enabled us to know something of the problem confronting institutional buyers. Out of this knowledge and cooperation, we have evolved an assortment of foods particularly suited to their individual requirements. Our Edelweiss label has become the symbol of fine foods economically packed; our quotations are received with interest wherever close and intelligent buying prevails.

The service of our Dietetic Department is available to you. Through the solution of the problems of other institutions, we may have immediately available information particularly helpful to you. We invite you to use this service.

*America's Largest Distributors of No. 10 Canned Foods*

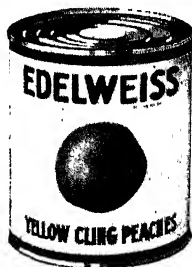

P. O. BOX-JS

CHICAGO

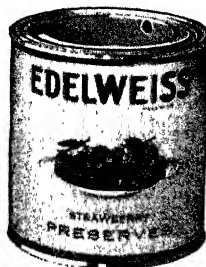

If you went into the finest garden and selected the vegetables to serve your pupils you could find no better than those which come to you packed under the Edelweiss label. Each vegetable distributed by Sexton is selected where soil and climate are best suited to its perfect production. Picked at just the right time, and packed on the spot, they reach you retaining all the vitamin value, full flavor and succulence of the fresh vegetable.

All of Sexton's Canned Fruits are equally delicious. All are allowed to completely ripen in the sun before being picked. Each fruit is obtained from the locality where it grows best—and then only the choice of the crop is taken. Packed in No. 10 tins, the container most economical for school cafeteria use.

Among other Edelweiss Foods particularly popular with school cafeterias are: Individual tea, cocoa, gelatine dessert, chocolate pudding, peanut butter, macaroni, spaghetti, canned fish, paper napkins and paper specialties, Edelweiss No. 10 cans soups, dried fruits and tapioca.

Delicious Edelweiss preserves, jellies, marmalades and fruit butters, made in Sexton's Sunshine Kitchens, are of excellent quality because the materials from which they are made—selected fruits and cane sugar—are the finest obtainable. They are made with great care, in small quantities, giving them the beautiful color and the delicious appeal of home made preserves. In our Sunshine Kitchens we also prepare a complete assortment of pickles, relishes and condiments of quality. Edelweiss quality mayonnaise dressing, catsup, mustard and chili sauce packed in handy gallon glass bottles.

## School men should consider pennies by saving vs. dollars by economy

It is shortsighted to lavish equipment on one department at the expense of another. But how much economy will plumbing and heating stand? Certainly by purchasing inferior materials efficiency is not only lowered, but the health of children is endangered. Then, too, it is an experiment that is paid for by increased maintenances, costly repairs and expensive replacements.

Crane engineers have studied this problem. They are prepared to offer a solution to it . . . to lower the cost of plumbing and heating systems without endangering either efficiency or the building budget. Already they have done it for numberless schools throughout the country. If you will drop into the nearest Crane Exhibit Rooms, you will be shown how they can do it for you.

Dear Mr. Halvorsen:-

We are delighted with the work this machine does, and  
 we have been very successful in the titling of books  
 on the back as well as side titles.

You might be interested to know that this quarter we  
 have bound and lettered 400 volumes for the college  
 library. All of this lettering was done by the Kwik-  
 print. It is extremely satisfactory, and was done by  
 twenty different students.

Yours very truly,

# How Do You Buy Cleaning Tools ?

On a Price Basis or  
Labor-Saving Basis?

Holcomb cleaning tools are not manufactured to sell at a price—they are designed to save labor. For 35 years Holcomb has experimented and perfected cleaning devices and *today*—almost 70% (seven out of ten) of the schools and colleges of the country are using Holcomb Cleaning Tools.

*We are endeavoring to war-  
rant this Year After Year  
Nation Wide Patronage.*

As labor takes 95 cents of your cleaning dollar, you need the correct cleaning tools to reduce this cost. Only 5 cents are spent for supplies. There is a Holcomb cleaning tool for every cleaning job that will do the work more efficiently, thereby reducing both the labor and material costs.

## LATHES

Lathes for school shops are of two types; those for metal working and those used in the woodworking courses. The metal-working lathes used by schools include the speed lathe, the engine lathe, and the turret lathe. The engine lathe is probably the most used since all work such as turning and screw cutting is done on it. The turret lathe which is used for multiple operation work will be found only in schools teaching advanced machine shop courses. The speed lathe is used almost exclusively for small operations such as polishing, etc.

## ANATOMICAL MANIKIN

Every College and School Should  
Have These Manikins

A Manikin is a complete, lithographed reproduction of the human body. It hangs upon the wall when closed, occupying the space of a picture. Open it, and fold after fold you turn just as you would turn the pages of a large book. So you pass from the skin to the skeleton. You see in its natural colors, life size in exact position, every vein, nerve, muscle, organ and bone in the body. The name of any one of these can be learned in a second by referring to the volume which goes with every manikin in which the 455 numbered parts are indexed. All anatomical facts are before you for reference and demonstration.

Life Size, 5 ft. 5 in. high. 455 parts, 30 folds  
Male \$18.00 Sexless \$18.00  
Female \$21.00 (with obstetrical supplement)  
Sent on receipt of N. Y. check or C. O. D.  
Money Back Guarantee.

## DURABILT GYM LOCKERS

*Save and Beautify—with steel*

### GYM LOCKERS

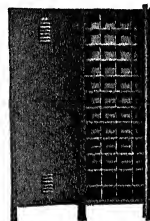

The efficient gym locker arrangement illustrated consists of one large locker for street clothing and six small lockers for gym suits, togs, etc. This arrangement could be varied by adding small lockers in double or triple tiers. The doors are usually equipped with padlocks. Write for descriptive literature and prices.

### SHOE LOCKERS

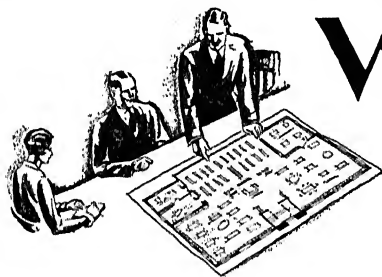

Shoe Lockers, either single tier or double tier are often recessed in the gymnasium walls, or stood in an adjacent room where they are accessible to gym class members who may require only shoe storage.

Shoe compartments are usually 6"x6" but other sizes that work out in proper multiples can be furnished. Write for further information and prices.

# Lasting MEMORIES

**I**T SHALL always be a glorious feeling to pick up the old annual and thumb thru its pages, recalling those happy days at school.

And with every year, that dear old Book, shall be more treasured, and more read than any other book in the Case. It can not be replaced.

It is only proper that serious thought be given to the Cover encasing that treasure. That Cover must serve its expected purpose.

It must have craftsmanship; it must have quality; and it must have richness, together with durability.

An Artcraft Cover; the cover of all covers, is built with that thought in mind. In after years, it shall be the same as when first bound. For it **MUST** stand up.

It is a pleasure to say that the Artcraft Covers encase many an annual and it is our hope that your annual will also be bound with an Artcraft Cover.

You will be under no obligation by asking for samples or designs for your special need. It will be our pleasure to serve you.

**MICROMETERS**

Instruments for measuring accurately very small angles or spaces, and are generally used in connection with a microscope or telescope. They are made in a great variety of forms, but in nearly all types the measurement is made by turning a very fine screw, which gives motion to a scale, lens, or ruled glass plate. See Surveying Instruments.

**MICROSCOPES**

Microscopes for school work have considerable variance in quality and precision depending entirely upon the work for which they are to be used. They can be secured having a magnifying power from thirty or less diameters up to a thousand diameters. In the simple microscope a single convex lens, between the eye and the object, forms an enlarged image. In the compound microscope an object glass or objective, near the object, forms a real image, which is viewed by the observer through a magnifying eyepiece. Either objective or eyepiece, or both, may be composed of more than one lens.

## PIANOS

Pianos are a necessary part of all school equipment, every school building being provided with one or more instruments. Schools having an auditorium should provide a grand piano. In schools where piano lessons are given, each practice room must have an instrument. In the grade schools a special small sized piano which can be moved from room to room is often used. This piano is also low enough that the teacher can see over the top of it and direct the singing of the class while playing.

These cords are made of heavy wire, and covered with silk cord, and have covered hangers and thick tassels, and are fitted with adjustable combination hooks for use on either nail or moulding.

## PICTURE FRAME MOULDINGS

For use in those manual training departments wishing to frame their own pictures. They are furnished ready to mitre into picture frames.

## PICTURE FRAMING SUPPLIES

For the many small items needed in the manual training work rooms, time and expense may often be saved by purchasing for one shipment from a house that operates work shops of their own.

## PICTURES

Pictures used in class and assembly rooms are usually prints of well known pictures, and of famous men. Several firms also put out prints of well known pictures for use in art study, and which may be used to familiarize students with the best known masterpieces of the world.

**PRINTING OUTFITS—SCHOOL**

The teaching of printing in schools as part of their vocational work has met with much favor. In addition to its vocational value, printing teaches the use of punctuation marks, the making of proper margins, the use of good English, correct spelling, capitalization, and indentation in an accurate manner. School printing outfits are designed for the smallest schools to largest universities.

Apparatus for projecting upon a white screen enlarged representations of diagrams, pictures, etc., drawn or photographed on glass slides. They are a modified stereopticon in which an apparatus is introduced in front of the condensing lenses and a powerful arc lamp used. To project microscopic objects, a microscope objective is placed in the axis of the rays of the condensing lenses and the image of the object is focused directly on the screen. To project spectra, a dispersing prism is placed in front of the object lens. See also, Stereopticons; also, Motion Picture Machines.

## SEATING EQUIPMENT

The school hours have a vital effect on the health of both pupil and teacher. Incorrect seating makes the children slump down in their chairs, causing bent backs, crowded abdomens, and stooping shoulders, while correct seating encourages correct posture and builds enduring habits of health. ## STATUARY

Statuary furnishes educational and illustrative material for several departments, from ancient history to art, and it serves a practical use when given to the schools as a memorial from classes and organizations. Very good reproductions of well known "originals" are furnished in marble, bronze, or composition. When determining the material from which the statue shall be made, purchasers should consider the usage to which it will be put, whether it will be a feature of the exterior or interior of the school building, and whether it will be used as subject matter for art or other classes.

*Beautiful and lustrous while  
cutting maintenance costs 1/2*

**CAR-NA-VAR** THE PERFECT FLOOR TREATMENT is a scientific combination of varnish gum and waxes. It gives a beautiful, lustrous, yet non-slippery finish to wood, linoleum, mastic, concrete, cork, etc. . . . protects the surface indefinitely from wear . . . and cuts maintenance costs as much as 50%. Comes in "natural" and popular colors. Applied with a mop—ready for traffic in an hour.

**RUBBER-VAR** THE PERFECT RUBBER FLOOR TREATMENT is a special treatment for rubber, soft composition and light colored terrazzo floors. Gives same desirable results as Car-Na-Var. It's waterproof.

Every person interested in the efficient and economical maintenance of floors should have a copy of "Floor Research". Written by a nationally known floor consultant. Write today for a free copy.

## TYPEWRITER DIN ♦

There are two kinds of typewriters.

The kind in which each key whangs the paper with a resounding whack.

(That's a hammer-blow typewriter.)

And the other kind . . . the pressure-printing typewriter, each key kissing the paper silently.

(That's a REMINGTON NOISELESS.)

For the relief of your teachers' and pupils' nerves, for the sake of their health and efficiency, equip your classrooms with the Remington Noiseless.

**WINDOW SHADES**

In the lighting of the schoolroom, much care should be exercised in the control of daylight through the use of proper shades. Shade cloth should be used which will tone the light to give eye-comfort, and bar out injurious glare. A good shade cloth will not crack, wrinkle, or show pin holes with usage.

Athey shades have been installed in many hundreds of schools. They are essential because there is perfect light control which is particularly important in schools, thus eliminating eye strain. They function as an automatic ventilator, they are never touched with the hand, they are good for 10 years of service and hence economical, and very attractive in appearance. Circle heads may be treated with sunburst shades.

The cloth is a herringbone woven coutil, 200 threads per square inch, guaranteed sunfast, pleated to  $1\frac{3}{8}$ ", stitched at each fold and made in 7 colors. They raise from the bottom and lower from the top, sustained at each side by strained brass wires as shown by the sectional cut. The cord case at the head is a steel channel with brass rollers for the cords, both the wires and cords passing through perforations in the cloth.

This skylight installation is in one of many school installations in Cleveland, two large skylights operated in unison with an endless woven wire cable diverted over ball bearing shives, which leads to a winch back stage. The principle in operation is the same as the vertical shade except that it operates horizontally, sustained on taut wires by brass clips at each fold of the cloth. When moving pictures are shown the collapsed shades emerge from the pockets which conceal them and disappear in like manner when not in use.

### Cloth-Lined Metal Weatherstrip

Is produced solely by this company and is the only weatherstrip which prevents the infiltration of dirt as well as cold air, and the same method is used in treating metal windows.

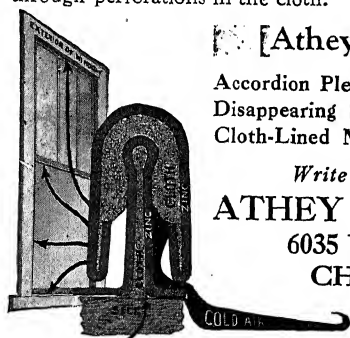

The City Sanitarium of St. Louis, the largest hospital in the country, was weatherstripped two years ago. They report that the first winter they abandoned one 350 hp. boiler, saved \$10,500 in coal plus the cost of stoking this extra coal and removing ashes, and cancelled a \$2,000 order for blankets.

**L**IKE miniature golf, tennis, baseball, etc., high school football has entered the realm of nighttime sports, and now parents, too, can attend the games.

Philosophically, this development in high school athletic games means more enjoyment for more people, since the leisure hours of most adults are confined to the evening.

Installation of equipment is merely a matter of days. The cost of current is negligible, and Benjamin equipment pays for itself in a short time by the increased attendance.

Benjamin equipment meets the needs of the various types of athletic fields. Write for data sheets.

## Jacobsen 4-Acre Power Lawn Mower

### Beautiful School Lawns At Lower Cost

**W**ELL kept school lawns, buildings and equipment are important in moulding the ideals and habits of the student. There is a Jacobsen model for every lawn, large or small.

The Jacobsen 4-Acre Heavy Duty Mower is used by the largest colleges and universities. With or without riding sulky it will cover more ground per day than any other mower of same size, and with a lower upkeep cost than any other walking-type power mower. It has a 24-inch reel, an enclosed gear drive, auto-type differential, separate clutch control

of traction and cutting unit, self-sharpening reel and other outstanding refinements. A Sickle-Bar clipping attachment may be had which clips dandelions and other weeds at the same time the lawn is mowed.

The "Junior" Power Mower is a quality Jacobsen Product with a 19-inch cutting reel. Suitable for moderately large lawns—particularly efficient on terraces.

## Consider these exquisite matters

WONDROUS fruits, tender as rose petals — fruits plucked at the precise moment in which they attain their dew dappled perfection. Sealed in their neat containers in bright clear syrups without loss of even a whisper of their field-fresh flavor.

Such are Richelieu and Ferndell and Batavia fruits—selected and prepared to epicurean standards and priced to average pocketbooks.

Vegetables saturated with the freshness of fragrant fields

at dawn, with flavors that send little ripples of “Oohs” and “Ahs” coursing around the dinner table—so incomparably fine that we contemplate them with reverence.

You will find more than 500 different Richelieu and Ferndell and Batavia foods—each one identical, no matter which label you buy them under. Each one prepared from our own special recipes, using only the very finest varieties of each fruit and vegetable and ingredient.

Sprague, Warner & Company  
600 West Erie Street  
*Chicago, Illinois*

**RICHELIEU or FERNDELL or BATAVIA**

Three complete lines of 500 Epicurean foods of identical quality—  
including the finest Fruits—Vegetables—Teas—Coffees—Preserves—  
Cheeses—Macaroni—and other good things to eat.
